

The DCR-Q was designed specifically for the Band I, Band II VHF markets (Channels 2-6). Based on the DCR-M Quadropole design, this side-mounted stainless steel array is designed for both Omni and Directional applications.

The DCR-Q VHF provides an economical solution for circularly VHF Polarized broadcast with much less loading than traditional panel arrays.

### Specifications:

- Full Circular Polarization
- Directional and Non-Directional applications
- 1/2 Wavelength bay spacing typical, which minimizes downward radiation
- Stainless steel element construction
- Low ice sensitivity
- Low weight and wind load
